

## Hobart Walking Tours

| Term           | Definition  |
|----------------|---|
| architrave     | a main beam resting across the tops of columns  |
| ashlar         | finely dressed masonry, individual stones worked until squared or the masonry built of such stone   |
| baluster       | a short decorative pillar forming part of a series supporting a rail  |
| balustrade     | a railing supported by balusters, an ornamental parapet to a balcony, bridge, or terrace.   |
| Benedict stone | reconstituted stone cladding, made from cement & crushed Brisbane tuff (soft volcanic rock made from volcanic ash)                          |
| buttress       | a structure of stone or brick built against a wall to strengthen or support it.   |
| corbel         | a projection jutting out from a wall to support a structure above it  |
| cornice        | a ledge or horizontal decorative molding that crowns a building, or over a door, window, the top edge of a pedestal or an interior wall     |
| cross gable    | where 2 gables intersect  |
| dentils        | a small block used as a repeating ornament in the base of a cornice, typically in classical & classical revival styles                      |
| dressed        | squared off neatly at the edges   |
| engaged column | round column, support structure, embedded in a wall and partly projecting from the surface of the wall, key marker in Roman revival         |
| entablature    | the upper part of a classical building supported by columns or a colonnade, comprising the architrave, frieze, and cornice.                 |
| fanlight       | semi-circular window, like an open fan, over another window or doorway, sometimes hinged  |
| frieze         | the part of an entablature between the architrave and the cornice   |
| gable          | triangular upper part of a wall at the end of a ridged roof.  |
| hipped roof    | a roof with a sharp edge or edges from the ridge to the eaves where the two sides meet  |
| masonry        | the building of structures from individual units, brick, marble, granite, sandstone, cast stone, concrete block, glass block                |
| mullion        | a major structural vertical or horizontal piece that combines two or more windows together  |
| oriel          | a large upper-storey bay with a window, supported by brackets or on corbels.  |
| parapet        | a low protective wall along the edge of a roof, bridge, or balcony.   |
| pediments      | the triangular upper part of the front of a classical building usually over a portico   |
| pilasters      | decorative only - a rectangular column projecting from a wall   |
| portico        | a roof supported by columns at regular intervals, usually attached as a porch to a building.  |
| quoin          | masonry blocks at the corner of the walls, either for strength or just as a corner feature , sense of permanence and strength               |
| reveal         | the frame of the window   |
| rustication    | textured surface to contrast with smooth ashlar, all other sides of stone block are dressed, used to give visual weight to the ground floor |
| sill           | the main horizontal part forming the bottom of the window frame   |
| string course  | a raised horizontal band or course of bricks on a building  |
| transom        | the fixed glass panel that is installed above the door  |
| vermiculation  | carved pattern, often in quoins, to look like worm tracks   |
| window head    | the main horizontal part forming the top of the window frame  |
